PROJECTS

1) Portfolio Website

Technology :- ReactJs, React-router-dom

My personal portfolio, built with React, serves as a digital showcase of my work, skills, projects, experiences, and expertise.

GitHub :- <https://github.com/VeerTheCoder/Portfolio>

2) Jobify

Technology :- MERN Stack

Jobify, a dynamic job tracking application built with the MERN Stack (MongoDB, Express.js, React, Node.js). Implemented user-friendly interfaces for seamless job management, real-time updates, data validation and responsive design. Integrated MongoDB for efficient data storage, Express.js for robust server-side development, React for a dynamic front-end experience, Context for global state management, and Node.js for scalable backend functionality and proper validation. This project showcased my proficiency in full-stack development and problem-solving skills, contributing to a comprehensive skill set in web application development.
